

Host-PIM cost breakdown: explicit availability boundary

Available native FP16 HBM2-PIM components (not full host-PIM latency)

Requested component	Status	Provenance
Host compute	UNAVAILABLE	frozen L40S bundle not located
Host memory traffic	UNAVAILABLE	frozen L40S/H100 bundle not located
Conversion / packing	UNAVAILABLE	no validated host boundary cost
Host→PIM traffic	COUNTED BYTES; LATENCY UNAVAILABLE	adapter / no frozen parametric source
PIM mode + CRF	INCLUDED; NOT SEPARABLE	SIMULATED_PIM_HBM2 trace
PIM memory / compute	INCLUDED; NOT SEPARABLE	SIMULATED_PIM_HBM2 trace
Mode exit + parkOut	INCLUDED; NOT SEPARABLE	24-cycle diagnostic retained
PIM→host + synchronization	AGGREGATE READBACK ONLY	SIMULATED_PIM_HBM2
